Full-Stack Developer | AI Builder | Founder | Hackathon Winner

Summary

Full-stack developer and founder focused on AI products, desktop automation, and rapid prototyping. Founder of Blinky, an AI desktop tutor and agent, and winner of HACKHAZARDS '26 by NAMESPACE.

Experience

Founder — Blinky AI

[Live](#) | [Instagram](#)

- Building an offline-first AI desktop tutor and agent that reads screens, provides visual guidance, and performs bounded computer automation.
- Developed across Tauri, React, TypeScript, Python, OCR, local/cloud LLMs, Playwright, and desktop automation.

Tech Nerds Community

Community Lead | [Instagram](#)

- Lead a technology-focused student community and organize technical sessions, events, workshops, and peer-learning initiatives.

Tech Titans, GNDU

Core Team Member

- Build and ship hackathon prototypes under tight deadlines while contributing to architecture, implementation, and rapid iteration.

GNDU Students Community

Graphic Designer

- Designed posters, banners, and event creatives for 10+ campus events.

Projects

Blinky — AI Desktop Tutor & Agent

[Live](#) | [GitHub](#) | [Instagram](#)

- Built screen-aware AI tutoring and desktop automation with OCR, visual overlays, voice workflows, app launching, browser automation, keyboard shortcuts, and bounded autopilot.
- **Stack:** Tauri, React, TypeScript, Python, Ollama, Groq, Playwright, Windows OCR, pywinauto.

HiringMates — AI Technical Hiring Platform

[Live](#) | [GitHub](#)

- Built AI-assisted technical assessments with code plagiarism/AI-code analysis, vision-based proctoring, keystroke telemetry, multiplayer coding, and GitHub candidate profiling.
- **Stack:** Next.js, React, FastAPI, Python, Supabase, Gemini, MediaPipe, Monaco Editor.

SIGMA — Signal Intelligence & Modulation Analyzer

[GitHub](#)

- Developed a GNU Radio + PyQt5 workstation for IQ/WAV analysis, symbol-rate estimation, modulation identification, demodulation, and bitstream extraction.

KiranaKeeper — Retailer & WhatsApp Commerce Platform

[Live](#) | [GitHub](#)

- Built a Firebase-backed retailer/wholesaler app with shared inventory, orders, udhaar, and bot status, plus a WhatsApp ordering assistant.
- **Stack:** React, Vite, Firebase Auth, Firestore, Node.js, Baileys, SQLite, Groq.

Skills

Languages: C, C++, Python, JavaScript, TypeScript | **Frontend:** React, Next.js, React Native, Tailwind CSS

Backend: Node.js, Express, FastAPI, Flask, Firebase | **AI / Systems:** LLMs, Computer Vision, OCR, Desktop Automation, GNU Radio, DSP

Databases / Tools: PostgreSQL, MongoDB, MySQL, Firestore, Git, GitHub, Vercel, Docker, Linux

Achievements

- **Winner / 1st Place** — HACKHAZARDS '26 (NAMESPACE) — [Blinky](#); ranked #1 among 2,657 projects.
- **2nd Runner-Up** — GDG Hackathon
- **Top 10** — PEC Hacks 3.0 (MLH), HackMol 7.0 (NIT Jalandhar), Thapar Eclipse Hackathon
- **Qualified** — Smart India Hackathon (Internal Round)

Education

B.Tech Computer Science Engineering — Guru Nanak Dev University

2025–2029

CS50x — Harvard University
